

# Problem

**Size** is one of the critical decisions for everyone to buy apparel. It differs on brand, retail, store and online and relay size chart and trials.

**Do you get what you see :** Shopper doubts if apparel will fit my style, prefer colour, material, looks and right match with other clothes.

**Location and price :** There is no platform available today for everyone to shop based on the ideal size and style nearby store and online on preferring location and price.

## Solution

The Web and Mobile App recommends best-fitted size with available style, colour, material, virtual preview, and where can buy nearby retail stores and eCommerce sites.
